

Mood Disorder Questionnaire

The following questionnaire can be used as a starting point to help you recognize the signs/symptoms of bipolar disorder but is not meant to be a substitute for a full medical evaluation. Bipolar disorder is complex **and an accurate, thorough diagnosis can only be made through a personal evaluation by your doctor.** However, a positive screen here may suggest that you might benefit from seeking such an evaluation from your doctor. Regardless of the questionnaire results, if you or your family has concerns about your mental health, please contact your physician and/or other healthcare professional.

When completed, your responses may be printed off for further discussion with your doctor.

Instructions: Please answer each question as best you can.
